11-9-2009

NOTICE TO ALL MINING CONTROLS CUSTOMERS:

Effective 1-1-2010 the manufacture of the old style LP and LP2 Area light fixture using the screw in fluorescent lamp will no longer be available. The reason for the change is due to quality problems with the screw-in lamp. A new replacement lamp and ballast is now in stock and will be available in an up-grade kit for all fixtures in the field.

(2021-35421-1 PL-T 26 WATT 4 PIN HIGH PERFORMANCE COMPACT FLUORESCENT LAMP AND BALLAST KIT 120 VAC 0.4 AMPS)

When purchasing new fixtures please go to the www.minelinesystems.com to find the replacement assembly for your current fixture or call Mining Controls Inc. for assistance.

The production of the screw-in fluorescent lamp will end June 1, 2010.

2021-33251 25 WATT BULB KIT (FOR LP LIGHT FIXTURES)

The replacement will be:

2021-35421-1 PL-T 26 WATT 4 PIN HIGH PERFORMANCE COMPACT FLUORESCENT LAMP AND BALLAST KIT 120 VAC 0.4 AMPS

It is my hope that this change will be made as soon as possible and with little or no problems. Please remember Mining Controls is trying to supply the mining industry with only the highest quality products.

Thank You Very Much

Larry W. Rowley
